

### Group 1 Review Reports

Group Id	Project Title	Questions you asked	Their Answer	Overall Evaluation / 100
6	University Accommodation Office	What happens if a user inputs a SQL query that is invalid?	Their Java program has code to catch exceptions in the query.	100
7	Flight Reservation System	Do you guys keep track of how many seats are available on a particular flight? If a user tries to reserve a seat on a full flight then do you guys handle that?	They do not handle it on the site, but in the database they have a capacity field that they update so they can see how many seats are available for a flight.	100
